

April 20 -24

Hello Families!

I hope that you had a great weekend!

Here are a few suggestions for your children to do this week :) There are also a couple of attachments (Math blurb, art suggestion from Mr. Lassche, careers suggestion from Mr. Lee and 'Rock Monster' story).

- Math - one page per day (I have attached the weekly 'blurb' in case your child has finished the last chapter)
- Journal- 4 to 8 sentences.
- Reading - 15 to 30 minutes per day
- 2 or 3 Scholastic activities (this also counts for the 'reading' part)
- spellingcity.com ('Group A'- list 31, 'Group B'- list 21)

There is also a fun little story that a mom in B.C. wrote to try to explain Covid-19 to her little girl. I have enclosed the link (story and fun activity) and an attachment in case you are unable to open it.

I hope that you have a fantastic week! I see that many of you are using the ixl and Raz-kids sites for extra practice! I hope you are enjoying them!

If you have any questions, please let me know :) If the children want to send me an email too, I would love it!!

Please remember that the recommended time for children in elementary grades is 2-5 hours per week. Please do what you feel is manageable for you. I am sending more than enough work to cover the suggested time so you have some choices :)

I hope that you are all receiving my emails. If you could send a quick reply, I would really appreciate it :)

Mrs. Haugen
