

Happy Monday!

I hope that you all had a great weekend!

I have scheduled a zoom meeting for 11:00 this morning. I thought I would go over a few of the math concepts for Chapter 21. This chapter introduces addition with regrouping. I have also included the written instructions from the math program for this chapter as well. Just look at the 'lesson' instructions. The other areas are touched on during calendar time etc... but feel free to add these if you like (although we haven't done shapes and solids yet as I save that for the last couple of weeks of school).

Continue to work on the weekly assignments:

- Math - one page per day (I have attached the weekly 'blurb' in case your child has finished the last chapter)
- Journal- 4 to 8 sentences.
- Reading - 15 to 30 minutes per day
- 2 or 3 Scholastic activities (this also counts for the 'reading' part)
- [spellingcity.com](http://www.spellingcity.com) ('Group A'- list 35, 'Group B'- list 25)

Many of you are raising chicks right now so I have attached a few activities that you might be interested in doing (a video, a booklet and 2 activities).

We are also being asked to complete a final report card for the year. Having an example of the children reading out loud would be really helpful as I usually do this throughout the year. If possible, I would like the children to do one of the reading assignments on raz-kids that I have assigned to them.

Mr. Lassche and Mr. Lee also have some activities for you to do that you can find on their virtual classrooms.

<http://tansor.sd79.bc.ca/virtual-classroom/>

Thanks you for all that you do to support your child's learning. You are doing great things with them at home and thanks for sharing that with me. Please remember to do only as much school work as you find reasonable for you and your child. If you have any questions or concerns, please contact me :)

Have a great week!

Mrs. Haugen
