

Happy June Division 11 !!!

I hope that you had a wonderful weekend :)

For **Math** this week, I would like you to do a math diagnostic on ixl.

\*when you login to ixl, click on Diagnostic

\*click on 'step into the arena'

\*answer the question if you can. If you cannot, click on 'I don't know this yet' which is on the bottom right of the question box. Do not worry if you cannot answer the questions. This is how the program figures out what levels to recommend for you to work on. :)

\*when the diagnostic is finished in all of the concept areas, the program lists several skills for you to work on. To access this, simply go back to your home page, click on learning and the recommendations pop up for you.

This is really helpful for you to do as it figures out exactly what level you should be working on.

For **writing** this week, I have attached 3 self assessments for the core competencies that we do at the end of the year. It would be great if you could send me a picture of these :)

As always, please try to:

- read for 15-30 minutes per day (if you haven't done the recorded try to do one this week)
- write 4 to 8 sentences in your journal
- spellingcity.com ('Group A'- list 38, 'Group B'- list 28)

I hope that you have a great week!!

Mrs. Haugen :)
