

Mrs. Vanderwilt's Menu of Learning Activities

Week of: June 8th to June 12th

Goal #1: Read 'just right' books with your child every day (Raz Kids website)

Goal #2: Try and do at least one activity from each column this week.

THIS WEEK WE ARE WORKING ON:

- Language and story as a source of joy
- Sharing ideas through pictures
- Sentence writing
- Practicing 'tricky' words to help our reading skills
- Observable patterns and cycles that occur in the local sky and landscape.
- Sorting objects from smallest to biggest.
- Measuring and comparing objects.
- Counting/printing our numbers to 80

Literacy	Numeracy	Science/Social Studies
Go to Class Dojo, and view the Printing Practice File. Practice your printing skills at home this week!	Go to Class Dojo to view the math page posted and complete math page 16.3 (page #226). Counting all the way to 80!	We've been having some interesting weather lately! Go to my website and view the literacy page. Click on the Epic! button. Once on Epic! type in 'weather' in the search bar. I would like you to read the first book that pops up: <i>Weather</i> by National Geographic.
Go to Class Dojo and view the Super Sentences File. Complete any 2 pages of your choice this week!	This week, go for a walk and choose 2 types of things from nature (i.e. rocks and sticks). Next, try sorting your things you found from nature in columns based on longest/shortest or smallest/largest etc. How many ways can you sort them? Colours? Shapes?	Our librarian, Mrs. Sumner came into our class last week and showed us all about the Library Learning Commons. I would like you to check this out, as there are some great resources you can view. Go to my website and view <i>Additional Resources</i> . You will find the link to the Learning Commons there.
Tricky words to practice writing 3 times each and saying orally this week: why, were, because . Bonus: create flash cards to practice all of your tricky words at home!	What is your favourite math game you have enjoyed learning or playing this year? Is there a math game you play at home? Play a math game this week with your family (i.e. addition/subtraction war, Yahtzee, memory match, Bump etc.).	Go to Class Dojo and view the science activity for the week (also attached to the weekly email). This week's activity is creating a cloud using a jar! Check it out and have fun!
